SUMMARY

As an undergraduate passionate about web development, I have built a strong foundation in front-end and back-end technologies through academic projects. I'm eager to apply my skills in a professional setting and contribute to innovative solutions, while further developing my expertise through a hands-on internship

SKILLS

- UI/UX Design: Figma
- Frontend Technologies: HTML, CSS, JavaScript, ReactJS
- Backend Technologies: MySQL, MongoDB, NodeJS, Java, MERN Stack
- Programming Languages: C, C++, Java
- Additional Knowledge: Proficient in HTML, CSS, MongoDB, MERN stack, and Android Studio, with a commitment to
- mastering new technologies.
- Soft Skills: Problem-solving, teamwork, communication, attention to details, time management, leadership.

PROJECTS

ITP PROJECTS - ADVANCE BLOOD DONATION SYSTEM | Y2S2 -2025

- Red Drop is designed with a robust set of functional modules to meet the specific needs of its users. These functions ensure that all essential processes involved in blood donation are managed systematically and transparently
- Technologies used: MongoDB , React, Express and Node(MERN Stack)

ITP PROJECTS - GROCERY ORDERING SYSTEM | Y2S1 -2024

- Developed a web-based Grocery Ordering System that allows users to browse, purchase, and pay for fruits, vegetables, drinks, and other household grocery items online. Utilized HTML, CSS, JavaScript, PHP, and MySQL for both front-end and back-end development.
- Implemented features such as CRUD operations for add to cart, payments and login portal for client and administrator side
