Colombo -03, Sri Lanka

Summary

As a full-stack developer and undergraduate student at SLIIT, I am passionate about creating impactful digital solutions using modern web technologies. My academic background and project experience have equipped me with skills in both front-end and back-end development, as well as version control and responsive design. I am now seeking an internship where I can contribute to innovative projects, further sharpen my skills, and gain practical experience in the IT industry.

Projects

ITP PROJECTS – ADVANCE BLOOD DONATION SYSTEM | Y2S2 -2025

Full Stack Developer

Tech Stack: MongoDB, React, Express and Node (MERN Stack)

- Red Drop is designed with a robust set of functional modules to meet the specific needs of its users. These functions ensure that all essential processes involved in blood donation are managed systematically and transparently. Developed modules for assignments, lecture uploads, timed video access, and resource sharing

ITP PROJECTS – GROCERY ORDERING SYSTEM | Y2S1 -2024

Full Stack Developer

Technologies: HTML, CSS, JavaScript, PHP, and MySQL.

- Developed a web-based Grocery Ordering System that allows users to browse, purchase, and pay for fruits, vegetables, drinks, and other household grocery items online.
- Implemented features such as CRUD operations for add to cart, payments and login portal client and administrator side

LIFELINE – BLOOD DONATION MANAGEMENT SYSTEM | Y1S2 - 2024

Developer & UI Designer

- Increased donation process efficiency by developing Lifeline, a dynamic blood donation system using PHP, HTML, and CSS.
- Developed helps connect hospitals and patients connect without interruption
- The application includes features for inquiring, booking, donating, and cancelling check ins or appointments. Along with an interactive and responsive admin dashboard

MONEY_UP – Finance Tracking App

Android App Developer

- Developed MoneyUp, a Kotlin-based mobile app for tracking expenses and setting budgets
- Implemented data persistence using SharedPreferences and Internal Storage
- Designed an intuitive UI with robust input validation
